

On... Job Security: End of Unemployment & Poverty

by William W Morgan

Interestingly and unexpectedly, job security is the key to ending poverty for the individual and society. Crucially, it is the key to controlling pollution and handling the societal effects that will result from global warming. It can lead to the solution to all our societal problems. It is a requirement for the survival of Homo sapiens. To prevent us from becoming extinct.

Everything you believe about how to acquire job security is almost certainly wrong. Yet it is simple to acquire it. And by doing so you also gain control over your own life and the realization of life's dreams. It provides the solution to employment of the handicapped. It can put money in your pocket almost immediately.

By thinking and a little bit of hard work each individual can totally revolutionize their life. The summation of which is society.

Job security is very simple. It is:

The ability of an individual to perform a task or tasks currently in demand in the marketplace at an acceptable market price.

When you couple that with a proper concept of Production Compensation, there is no chance of becoming unemployed. Which is:

Production compensation must be based solely on the market value of error-free task completion.

Together these concepts put the individual worker in complete control of their life. They are paid based on their education, ability, drive and quality of work. Plus, they are properly compensated for innovation. Innovation is the driver of productivity. Both company and individual are winners.

The company is ensured of complete cost control and zero-defects quality. Think of this and other results.

When the individual has true job security, they never need fear unemployment. They could be relatively "poor" at first. But this will slowly and continuously improve. And they will not want to do anything to disturb this prospect.

They will not become "nitpickers", and wish to interfere in the lives of others. To march and protest. And certainly not to engage in any "anti-social activities". Such as crime and terrorism.

The summation of this for society is little or no disorder. A continuously improving society and life for everyone.

Job security and utilization of a proper concept of production compensation—and with it individual freedom—is the only way we can ever solve our societal problems.
